

Steady core, brighter 2H26 ahead

- 2Q26 NP beat forecast on one-off tax refund; core profit in line
- FY26E USD sales guidance raised to 17-20%
- Maintain BUY at TP THB22.00 on 18x 2027E P/E

Net profit beat on early tax refund receipt

2Q26 net profit was THB844m (+21.3% y-y, -3.1% q-q), 16% above our forecast of THB726m, driven entirely by a net one-off US tariff refund of THB131m (after tax) and THB12m FX loss rather than any change in underlying trends. Normalized profit was THB725m, in line with our forecast. Normalised revenue was also in line at THB4,869m (+8.8% y-y, -5.9% q-q), led by continued strong growth in Pet Treats (+62.3% y-y) and cat food (+4.3% y-y), while dog food declined (-5.7% y-y). By geography, the Americas (+14.0% y-y) and Europe (+8.1% y-y) remained the key growth engines, while Asia and Oceania was broadly flat (-1.1% y-y).

Core margin eases on rising costs

Reported GPM came in unusually high at 29.7%, boosted by tax refund benefit recorded as a direct reduction to cost of goods sold. Excluding this one-off, normalised GPM eased to 24.0% (24.3% in 1Q26; 25.0% in 2Q25) on higher tuna and packaging costs recognized late in the quarter, though still above our 23.2% forecast as faster Pet Treats growth, ITC's highest-margin category, lifted the blended mix. Management noted the 2Q26 refund covers nearly the full eligible amount, with only a small residual balance left to pass through to customers, implying limited further profit impact ahead.

SG&A up on freight; payout ratio stays high

SG&A rose to THB544m (+9.9% q-q, +18.3% y-y), driven by higher freight costs and selling expenses that scaled with revenue growth. Separately, the Board declared an interim dividend of THB0.55/share, implying a 96.2% payout ratio, above our 0.40/share forecast.

Guidance raised on stronger USD sales outlook

We raise our FY2026E net profit forecast to THB3,481m (vs. THB3,320m previously), on the back of stronger sales guidance led by Pet Treats. Management raised FY2026E revenue growth guidance to 17-20% in USD terms (from 9-12%) and 14-17% in THB terms (from 8-11%), while GPM and SG&A-to-sales were unchanged. With cost-plus price adjustments taking fuller effect through the quarter, we look for core profit to grow on both a q-q and y-y basis in 3Q26, before peak-season volumes drive the strongest quarter of the year in 4Q26.

Maintain BUY; TP THB22.00

We maintain BUY and TP at THB22.0 on 18x 2027E P/E as we keep our FY2027E net profit forecast unchanged at THB3,725m. ITC's structural growth story remains intact, anchored by the ongoing premiumization trend and Pet Treats penetration across key export markets, alongside continued efficiency gains under the Tailwind cost program.

I-Tail Corporation (ITC TB) | THAILAND / SET / FOOD & BEVERAGE

ESG Analysis

ESG Assessment	SET ESG	Bloomberg
Environment As a wet pet food manufacturer, ITC's most material environmental exposure is GHG emissions from energy-intensive production and Scope 3 raw material sourcing, particularly tuna. Total Scope 1-2 emissions fell to 50,486 tCO₂e in 2025 (-6.1% y-y), representing a 22% reduction versus the 2021 baseline, ahead of the Group's SeaChange 2030 target of a 42% reduction by 2030. Key initiatives include the installation of 2.2 MW solar PV at Samut Sakhon (completed 2025), a biomass boiler at Songkhla to reduce fossil fuel reliance, and a Zero Liquid Discharge system to minimize water discharge. Water consumption declined materially to 213,044 cubic meters in 2025 from 285,882 in 2024. No environmental legal violations were recorded in 2025.	A	4.05
Social Labour practices represent ITC's most significant social risk, given its large migrant workforce across two manufacturing sites. The Company implements the Employer Pays Principle, covering all recruitment costs for migrant workers since 2022, and holds a Certificate of Recognition as a Forced-Labor-Free Workplace. Headcount rose to 15,367 in 2025, reflecting capacity expansion. Voluntary turnover increased to 15.56% in 2025 from 11.10% in 2024, warranting monitoring as the workforce scales. Lost time injury incidents remained low at 14 cases in 2025. ITC received the Outstanding National Labor Relations and Employee Welfare Award for the ninth consecutive year at its Songkhla site.		1.20
Governance ITC's governance is structurally influenced by its 79.3% parent Thai Union Group, which limits free float and board independence in practice. The Board comprises 11 directors, with 4 independent directors (36.4%), meeting the SEC minimum. The Chairman is a non-executive, non-independent director; a Lead Independent Director has been appointed to provide a governance check. ITC received an "Excellent" 5-star CG rating from Thai IOD in 2025 and was included in the ASEAN CG Scorecard ASEAN Asset Class. No bribery, fraud, or ethics violations were reported in 2025. The Company is a certified CAC member.		4.21
Overall CG Score: Excellent (5-star) CAC: Certified	A	3.12

Bloomberg ESG scores reflect FY2024 data (latest available). SET ESG Rating as of 9 January 2026. CG rating reflects 2025 Thai IOD survey.

RECOMMENDATION STRUCTURE

Stock Recommendations

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY: Expected return of 10% or more over the next 12 months.
HOLD: Expected return between -10% and 10% over the next 12 months.
REDUCE: Expected return of -10% or worse over the next 12 months.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Sector Recommendations

Overweight: The industry is expected to outperform the relevant primary market index over the next 12 months.
Neutral: The industry is expected to perform in line with the relevant primary market index over the next 12 months.
Underweight: The industry is expected to underperform the relevant primary market index over the next 12 months.

Country (Strategy) Recommendations

Overweight: Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral: Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight: Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
